

SUPPLEMENTAL QUESTIONNAIRE I/M TECHNICIAN

The following questions will be considered as part of your application for I/M Technician position. Limit each response to the space allowed. Your responses must be attached to your application in order for you to be considered for this position. Do not substitute any other material in lieu of a response to the questions on this questionnaire.

1. Describe in detail any post high school training/courses you have had in relation to automotive/diesel technology.

2. Describe any **full-time** experience you have had in relation to heavy duty diesel technology; dates must be included.

3. Describe any **full-time** work experience you have had in conducting emissions testing on automotive and diesel trucks and cars; dates must be included.

4. Describe the type of emissions testing equipment you are experienced at using; include dates and frequency.

5. Describe any **full-time** work experience you have had using a dynamometer; include dates and frequency.

6. Describe any **full-time** work experience you have had interpreting and enforcing the legal requirements of a Motor Vehicle Inspection/Maintenance Ordinance; dates must be included.
